Fluffy

Fluffing up for Linux Tag

Fluffy will be present at Linux Tag 2010 in Berlin! In other news this is a test post on our new site we just created for the most cuddly and fluffy and awesome and great and pink and plush and nice and ludicrous and punk linux distribution's news blog!

For everyone who is going to be at LinuxTag in Berlin tomorrow. Frederik is giving a talk on Fluffy, you really want to check this out. Also make sure to stop by at the the booths starting with K 😊

[Further reading](#) on LinuxTag matters are available on the Fluffy website.

Paul Adams is also fluffying up for Alpha1!

In related news:

- We are now also Fluffy on freenode: come visit us in #fluffy
- Arrival of alpha 1 is **very** close (if you want to test the alpha1 candidate, poke me on IRC)
- Work on a website has started, checkout <http://fluffy.jussi01.com/> (thanks to Jussi for hosting)

FLUFFY
Linux in Pink

Previews of Fluffy

We are working hard on the first alpha preview release of Fluffy. In the meantime here are some preliminary pink pictures we took during the last days.

Since we are promoting Parley on Linux Tag in Berlin right now, we could connect with some of our fans. Paul is one of our first users! He put on his pink tie, just to show his support.

Fluffy Linux – For Those Who Like Pink, Bunnies And Unicorn

Filed under [News Updates](#)

[0 Comments and 0 Reactions](#)

Pink, Bunnies and Unicorns are what you will most probably find in a little girl's room and certainly not in a Linux distro. But now there is Fluffy Linux with all the pink-ness (if there is such a word), bunnies, unicorn and, of course, fluffiness you can find. Here is a screenshot to make everything clear:

Fluffy, una distribución de peluche y conejitos ;-)

Hace tiempo vi una captura de este tema y me quedé maravillada. Parecía un algodón dulce de los que se compran en la feria.

Hoy, visitando el blog de [ApacheLogger's Log](#) he visto que ha hecho un post sobre esa distribución tan preciosa de Linux, que ésta por salir y no he podido evitar traerla para todos vosotros.

Fluffy, que así se llama, al parecer nació a raíz de Parley, una aplicación de aprendizaje de idiomas. Al querer probar la capacidad de tematización de ésta finalmente acabaron creando Fluffy.

Linux-drengene drømmer lyserøde drømme

Ny distribution kan gøre Linux populært i Hannah Montana-segmentet. Men måske blandt andre brugere.

Af Kasper Villum Jensen
Mandag 7. juni, 2010 14:22

mind

Der er allerede lavet linux-distributioner målrettet kristne og muslimer. Og nu ser en niche-distribution dagens lys.

Og med navnet Fluffy er der ikke nogen tvivl om den røde tråd i distributionen.

Fluffy-distributionen er lyserød fra ende til anden. Og så er der drysset lidt enhjørninger og nuttede kaniner hist og her henover brugerfladen.

Dermed må man forvente, at den primære målgruppe skal findes blandt piger i de nederste folkeskoleklasser. Men distributionens skabere håber, at de har ramt et behov i en anden målgruppe.

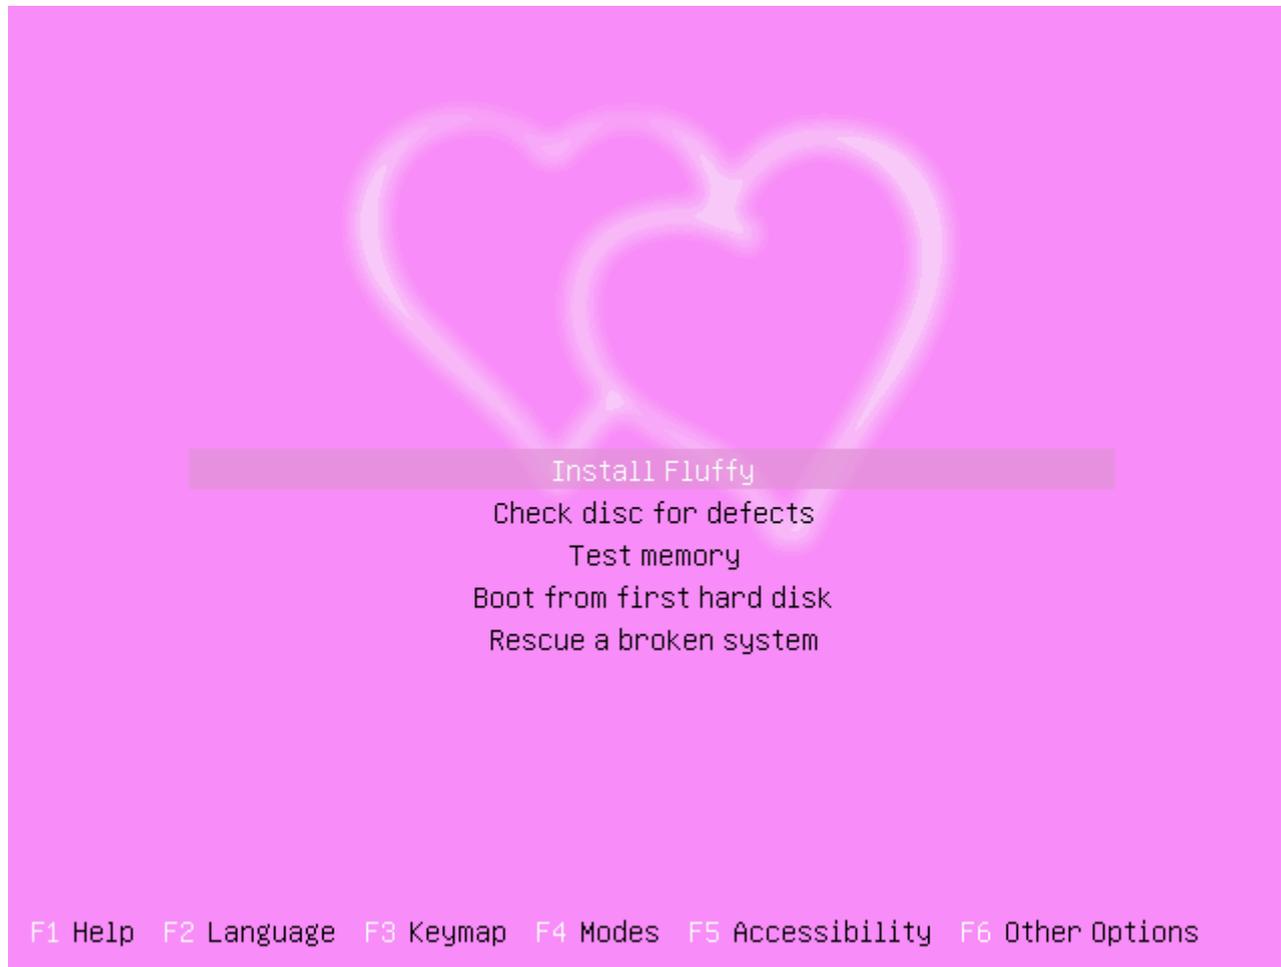

Posted 05 June 2010 - 16:20

Inspired by [Hannah Montana Linux](#), a team of developers are now announcing a new distribution that promises to be "made out of fluff, bunnies, unicorns and awesome."

Resized to 56% (was 1600 x 1000) · Click image to enlarge

we haz alpha 1

Paradigms and stuff

(slide with too much text)

- left hand window buttons allow extra unicorn space (fun)
- clear windeco (♥ for love for fullscreen)
- only voluntarily cooperating unicorns used (unicows as fallback) – we value animal rights!
- pink is the fluffy-most color, followed by purple which also has a p at the beginning and is almost as fluffy
- still much work, new KDE users, blah blah, join!

Stay Fluffy!
